PROFILE

I am an undergraduate student majoring in Computer Systems and Network Engineering, eager to apply my academic knowledge in a practical setting. With a strong foundation in network design, system optimization, and cybersecurity, I am seeking an internship where I can contribute to real-world projects and learn from industry professionals. My academic interests include Artificial Intelligence and Machine Learning. I am committed to continuous learning and am excited to apply what I've learned in class to real-world challenges. I look forward to taking this next step in my journey toward a successful career in technology.

EDUCATION

BSc (Hons) in Information Technology Specializing in Computer Systems & Network Engineering

10/2022 – present
Malabe, Sri Lanka

Sri Lanka Institute of Information Technology

Current year - 4th Year

Expected Graduation - June 2026

General Certificate of Education Advanced Level

2021

St Peter's College

Bambalapitiya

Combined Mathematics - C

Chemistry - S

Physics - C

General Certificate of Education Ordinary Level

2018

St Peter's College

Bambalapitiya

9A's for all subjects

SKILLS

- Networking & Routing
- Programming Languages (C, C++)
- Ability to work as a part of a team
- Leadership skills

LANGUAGES

Sinhala

English

CERTIFICATES

Diploma In Computer Application

Sarvodaya-Fusuion

04/2019

Grade - A pass

Certificate of Course Completion

CCNA: Switching, Routing, and Wireless Essentials

Issued by Cisco

Diploma In Cloud Computing and Security

NextGen Campus

PROJECTS

Battle Buddy 2.0

08/2025 – 07/2024

A Secure IoT-Based Real-Time Soldier Health and Localization Monitoring System with Predictive Intelligence

Developed an IoT-based soldier monitoring system that tracks real-time health conditions and GPS location using wearable sensor nodes. The system integrates heart rate, SpO₂, body temperature, fall detection, GPS tracking, LoRa communication, Kalman filtering, and a real-time dashboard to support battlefield safety and emergency response. My research contribution focused on GPS localization, Kalman filter-based location accuracy improvement, and IMU-assisted tracking during weak GPS conditions

Nagios IT infrastructure monitoring Server

Built and configured a Nagios IT infrastructure monitoring server in a client-server environment using Fedora and CentOS

AREAS OF INTEREST

Network Engineering

Network Security

Cyber security

PROFESSIONAL EXPERIENCE

IT Support Intern

04/2025 – 09/2025

Telecommunications Regulatory Commission

Narahenpita, Sri Lanka

During my internship at the Telecommunications Regulatory Commission of Sri Lanka, I was involved in supporting daily IT operations within a telecommunications regulatory environment. My responsibilities included assisting in troubleshooting hardware and software issues, providing technical support to staff, and helping maintain network and system functionality. I also contributed to documenting IT processes and procedures, ensuring better organization and knowledge sharing within the team. This role allowed me to gain hands-on experience with real-world IT infrastructure and support systems
